

Configure Apple iOS Devices for secure Wi-Fi access

The following instructions will allow you to connect your Apple iPhone or personal iPad device to the ECSD-Priv wireless network.

Configuration instructions:

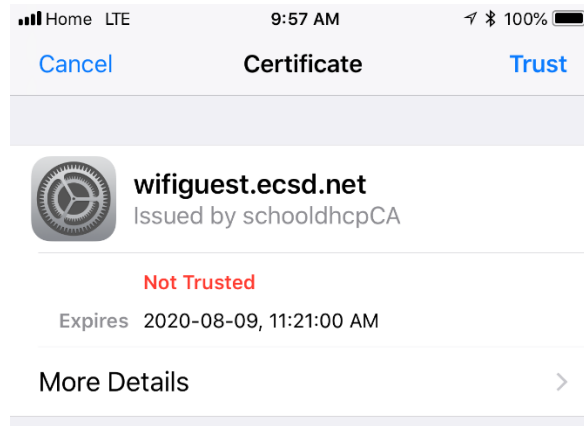

1. Click "Settings" then select "Wireless & Networks" and "Wi-Fi settings".
2. Select the **Wi-Fi** option from the left hand side menu and make sure that the **Wi-Fi** is turned on by toggling the button.
3. You will then be presented with a list of available networks under the **CHOOSE A NETWORK** option. From the list, select "**ECSD-Priv**".

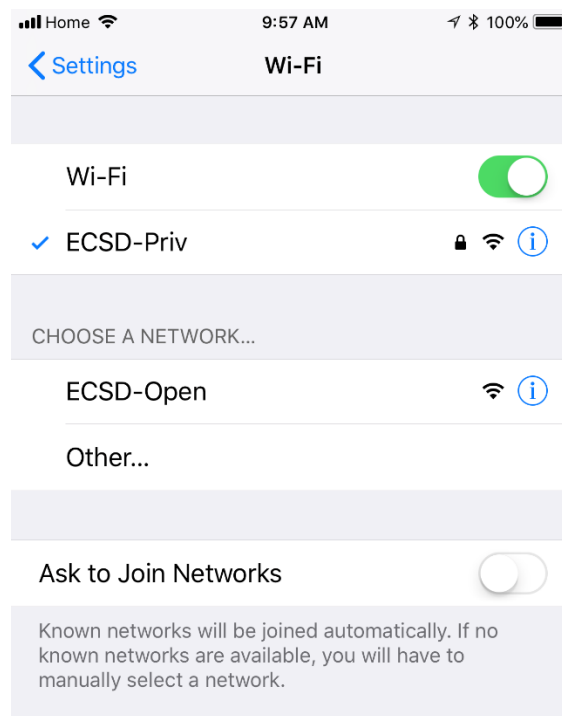

4. You will be prompted to input a **username** and **password**. Please enter your ECSD username, e.g. "id18774", and your password.

The screenshot shows an iOS interface for entering a password. At the top, the status bar displays 'Home LTE', '9:57 AM', and '100%' battery. Below the status bar, a grey header contains the text 'Enter the password for "ECSD-Priv"'. Underneath the header is a white bar with three buttons: 'Cancel' (blue text), 'Enter Password' (black text), and 'Join' (blue text). Below this bar is a light grey section containing two text input fields. The first field is labeled 'Username' and contains the text 'ta11748'. The second field is labeled 'Password' and contains ten black dots. Below the password field is another light grey section with the label 'Mode' and the text 'Automatic >'. At the bottom of the screen is a standard iOS keyboard with a blue 'Join' button on the right.

5. Touch "**Join**".
6. You will be prompted to **Trust** a certificate in order to connect to the network. Please verify the certificate name is "**wifiguest.ecsd.net**" before accepting it.

7. Once you have accepted the certificate, you will be connected to ECSD-Priv. You will notice that it is now listed under **Wi-Fi** and there will be a **Wi-Fi** icon at the top of your screen.

NOTE: Please note that you will have to "Forget" the ECSD-Priv wireless network in order to change the username or password.

Your device should now connect automatically to the ECSD-Priv wireless network whenever it is in range.
